Education

General Assembly Web Development Immersive Program *April 2018*

Georgia State BA in Computer Information Systems *May 2022*

Research

IBM Watson

Utilized IBM's Natural Language Understanding API in a MERN stack build for my final project at General Assembly. Heroku Launch Address:
<https://identi.herokuapp.com>

TensorFlow

Researched Residual Deep Learning and Neural Networks (2018 - Present)

Episerver

CMS administrator and author of corporate training guides and other literature

Experience

Applied Systems | Web Developer & Episerver Administrator | *March 2019 - Present*

- Languages utilized: .NET(C#), HTML, XML, SCSS/CSS, Javascript, PHP and SQL
- Frameworks & Technologies utilized: Gulp, Bootstrap, Skeleton, Node, Microsoft SQL Server
- Acted as a full-stack web developer and administrator for multiple CMS platforms (Episerver & Umbraco)
- Developed complex controllers as well as page and block types in .NET MVC
- Updated code and developed releases in XML for corporate intranet (Umbraco CMS)
- Bug tested in .NET by utilizing Microsoft Visual Studio debugging
- Created a large corporate docket of internal Episerver training materials for developers and CMS editors
- Planned projects for releases and website updates via wireframes and user stories
- Utilized Agile methodologies for sprint planning, execution and review
- Migrated over 1,000 webpages for corporate website transition to Episerver DXP/CMS

- Produced live webinars for clients and employee training

Hewlett Packard Enterprise | Software Engineering Intern | *April 2018 - October 2018*

- Accomplished patch coordination efforts between three organizations within HPE (DXC, SolCX and TSS R&D) through phase implementation across production and development environments
- Accomplished engineering story point conservation by implementing quarterly certificate renewals
- Monitored internal security certificates and submitted security reports directly to head of Cyber Security
- Tested Docker application containers for security vulnerabilities and documented results
- Ran daily stand-ups for the R&D department

Trustfuel | Web Development & Content Creator Intern | May 2017 - November 2017

- Developed CMS content for the SAAS website
- Worked directly with web developers on QA / Bug testing schedules
- Acted as a Web Development & Content Creator Intern
- Monitored customer bug submissions and utilized software for internal QA
- Submitted QA results to lead web developers and assisted in SDLC planning

The Home Depot | Flooring Specialist | October 2016 - April 2018

At the Home Depot I acted as a flooring specialist:

- Worked directly with customers on creating flooring plans for hardwood and carpeting
- Created CAD designs for flooring plans for installations
- Ordered inventory for businesses using corporate intranet software
- Customer service, stocking and daily inventory tasks
